Master of Science in Media Technology and Engingeering
Linköping University
August 2011 - ongoing

Distance course in Web Programming
Malmö Högskola
June 2013 - August 2013

Secondary education in Natural Science
Karolinska Gymnasiet
August 2008 - June 2011

Education

Media Technology is a versatile education about computer knowledge. It provides a solid foundation in mathematics and engineering and also the opportunity to specialize in subjects such as visualization, computer graphics and software development.

The course gives knowledge on how to create a basic foundation for a website with HTML and CSS.

Website

Projects

Procedural Fracturing
Python / Maya

The project is a fracture script for Maya written in Python for creating fractures on objects using a non-physically-based basic procedural method.

Video
Report

Domen genom tiderna
3ds Max / Stereo / Premiere Pro

A short movie produced for the dome theater at Visualiseringcenter C in Norrköping. It is filmed in stereo and combines models from 3ds Max with filmed material.

Video
Report
